

**VEIN THERAPY/VASCULAR SURGERY**

**James E. Craven, M.D.**, Board-Certified Vascular Surgeon  
**Brandie Henry, PA-C**, Director of the CVT Vein Therapy Center  
**Liz Causey, BS, RVS**, Vascular Technologist

**THE CVT VEIN** Therapy Center specializes in the evaluation and treatment of varicose veins, spider veins and their associated complications. We are able to evaluate a patient's problem, perform the diagnostic ultrasound and make a treatment plan the day of a patient's initial consultation. Our goal is to make the whole process as easy as possible. With major advances in technology, the ability to treat varicose and spider veins with simple in-office procedures has improved dramatically.

Dr. Craven has been with CVT for 10 years. He is accompanied by three other board-certified vascular surgeons: Dr. P. Michael Davis Jr., Dr. Michael S. Connors and Dr. James W. McNeil. Our specialists are dedicated to helping patients achieve optimal results.

Brandie Henry, PA-C, joined CVT in 2009 and specializes in treating patients

with venous insufficiency. She has over eight years of experience treating spider veins with a technique called sclerotherapy, which is performed in the office. Free consultations are available at the CVT Vein Therapy Center for the evaluation of cosmetic concerns.

Liz Causey, BS, RVS, has been a member of the CVT team since 2004 and specializes in ultrasound testing to diagnose diseases of the venous system. She works along with 16 other registered vascular technologists in the CVT vascular lab who do a variety of vascular testing for both arterial and venous disease.

At CVT Vein Therapy Center, patients are able to receive all of their care under one roof, and most procedures are covered under insurance. Above all, our staff strives to offer high-quality care with an exceptional patient experience.

**EDUCATION**
